RESOLUTION

TARIFFS

New Delhi, the 14th July 1951

No. 48(1)-T.B./50.—The Tariff Board, which was asked to enquire into the claim for protection to the Electric Brass Lamp Holders Industry, have in their Report recommended that—

(1) A protective duty of 45 per cent. *ad valorem* should be imposed on electric brass lamp holders of British manufacture and the standard rate of duty should be adjusted in accordance with the terms of the India-United Kingdom Trade Agreement, 1939, the existing margin of preference being 12 per cent. and the guaranteed margin 10 per cent. The protective duties should remain in force up to 31st December, 1953.

(2) Government Departments and Railways should continue to purchase their requirements of electric brass lamp holders from the indigenous industry.

(3) The Indian manufacturers of brass sheets have declared their willingness to make direct supplies of brass sheets of the requisite specifications to the electric brass lamp holders industry. The industry should take advantage of this offer and, if necessary, make arrangements to pool its requirements on a regional basis and place bulk orders with the Indian manufacturers of brass sheets.

(4) Reports from the Government Test House, Alipore, and other evidence received by the Board show that the quality of electric brass lamp holders made in India is reasonably satisfactory. There is, however, scope for improvement in quality. The indigenous industry should take note of the defects referred to in paragraph 11 of the Report and try to remedy them as early as possible.

(5) The attention of the porcelain manufacturers should be drawn to the complaint that the porcelain insulators used in the indigenous brass lamp holders are not of the proper standard, and they should be asked to improve the quality of their product.

(6) The labour charges at present incurred by the industry per unit of its output are unduly high. The industry should, therefore, take early steps to train its labour and to modernise its equipment and Government should give the industry all reasonable assistance in this regard.

(7) In order to enable the Board to maintain a continuous watch over the progress of the industry, the industry should be asked to send to the Board half-yearly reports commencing from 1st January, 1951, giving information regarding production, sales, stocks, cost of production and selling prices. Such reports should also include detailed information about the prices and the supply position of raw materials and any other factors having a bearing on the development of the industry. The Lamp Holders Manufacturers' Association of India, Calcutta, should also undertake the collection of statistical data on these aspects of the industry.

2. Government accept the Board's recommendation Nos. (2) to (7). They also accept in principle that the industry qualifies for protection, but consider, after consultation with the Tariff Board, that in the conditions prevailing today, there is no need at present to increase the existing rate of duty. The prices of imported brass lamp holders have gone up by about 25 per cent. while those of Indian manufactures have increased much less. With present import restrictions, Indian electric brass lamp holders are being sold without difficulty at rates higher than the selling prices recommended by the Board. The existing Revenue duties will, therefore, be converted into protective duties. A watch over the quantity and prices of imports will be kept and suitable action taken as necessary.
